

SONIC RADIUS PANEL

Specifically designed for curved surfaces, convex and concave Radius Acoustical Panels offer performance and aesthetics along difficult-to-cover curved walls or columns. These panels feature a perforated co-polymer facing to provide maximum durability in high-traffic areas.

SONIC RADIUS PANEL

SONIC RADIUS PANELS Core consists of a 6-7 lb. density rigid fiberglass with a perforated co-polymer plastic face for strength. Back of fiberglass is mechanically scored to aid in flexibility and bend. Your chosen finish selection is bonded directly to the panel face with all edges wrapped carefully and completely to the back of the panel to ensure a straight, flat, wrinkle-free surface with tailored corners.

A LARGE VARIETY OF STYLISH FINISHES including fabrics and vinyls are available. See the “Finishes” page on Lamvin.com for a direct link to our recommended suppliers’ catalogs which include detailed images of an array of designs. Custom fabrics and printed fabrics are also options. All finishes shall be reviewed for panel stability.

APPLICATIONS:

- Lobbys
- Restaurants
- Any High Traffic Area

SPECIFICATIONS:

THICKNESS 1 1/16” | 1 9/16” | 2 1/16”

CUSTOM SHAPES MAX SIZE 4’ X 12’

NRC 1 1/16” 0.9 | 2 1/16” 1.10

FIRE TEST ASTM E84-Class I/A
