

SONIC ULTRA PLUS HIGH-IMPACT PANEL

SONIC ULTRA PLUS HIGH-IMPACT PANEL

SONIC ULTRA PLUS PANELS have an extremely tough perforated co-polymer surface exposed on its face and wrapped around all edges to the back. Lamvins' exclusive Ultra Plus High-Impact Acoustical Panel offers superior acoustical absorption and strength and is available in an array of color choices.

The core consists of a 6-7 lb. density rigid fiberglass with a perforated co-polymer plastic face consisting of an even pattern of perforations with 40% open area for sound absorption. (Custom perforations available). Co-polymer is covered to the back with clean, sharp edges and square corners.

EXPOSED PERFORATED CO-POLYMER PLASTIC FACE. Custom perforation sizes, patterns, and colors to select.

APPLICATIONS:

- Schools
- Gyms
- Any place you need durable acoustical absorption
