Acoustical Manufacturer LAMVIN Introduces Hushwood™ Sustainable Panels to the Market

Oceanside, CA, May 31, 2022 | [LAMVIN](#), a [Catalyst Acoustics Group](#) company and manufacturer of premium acoustical products, is delighted to announce the launch of [Hushwood™ acoustic panels](#), adding to its sustainable [Hushtone](#) line of PET products. Hushwood features a facing of wood-veneered slats evenly spaced to expose a black PET felt backing. The innovative design creates striking linear patterns on walls or ceilings while also allowing for simple and intuitive installation.

Hushwood panels measure a sizeable 24" x 96" x 0.87" and ship ready to install, though they can easily be cut to size in the field, if desired. The product is ASTM E84-Class I/B fire-rated and available in four natural and attractive woodgrain finishes: Ash, Walnut, Oak, or Birch.

David Castellanos, President of LAMVIN, spoke of the launch enthusiastically sharing, "based on the success we've seen from the rest of our Hushtone line, as well as our Sonic Timber family of products just launched in 2021, we knew we wanted to find a way to combine the two. By uniting PET and wood, Hushwood is that solution, and we can't wait to share it with the world."

Like products in the Sonic Timber™ line, Hushwood is an eco-friendly alternative to wood building materials. "It comes at a considerably lower price than wood products," Castellanos added.
