LAMVIN

SONIC PRINTED ART PANEL

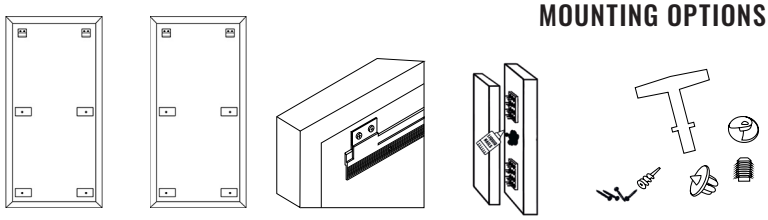

SONIC PRINTED ART PANELS open up infinite possibilities for your creativity and imagination by offering limitless design options while optimizing the acoustics in your space. Your image of choice can be printed as a singular panel or arrayed into multiple panels to cover larger surface areas. These panels are suitable for framing, further extending décor possibilities. Perfect for artwork, logos, or any custom image of your choice.

YOU CAN ACHIEVE A HIGH QUALITY PRINTED FINISH when you supply a large format image of 300dpi or greater resolution. The best format to use is a vector file (EPS or AI), but we can work with most photo formats if the image is large enough.

APPLICATIONS:

- Printed Signage for Businesses
- Mural walls
- Anywhere you would like to display artwork
