SOFT TONE PANEL®

A CATALYST ACOUSTICS GROUP COMPANY

LAMVIN®

Product to be discontinued. Available while supplies last. Contact Lamvin for current inventory.

Soft-Tone Acoustical Panels are an exceptional choice when a versatile sound barrier is required to reduce traveling noise. Specifically designed for classrooms, conference rooms, offices, or anywhere a high-quality sound barrier is needed.

SOFT TONE PANEL®

SONIC ABSORBER PANELS core consists of a perforated mineral fiberboard made of organic fibers that resist moisture and minimizes expansion and warping.

A LARGE VARIETY OF STYLISH FINISHES including fabrics and vinyls are available. See the "Finishes" page on Lamvin.com for a direct link to our recommended suppliers' catalogs which include detailed images of an array of designs. Custom fabrics and printed fabrics are also options. All finishes shall be reviewed for panel stability.
