

TACKBOARD PANELS

A CATALYST ACOUSTICS GROUP BRAND

LAMVIN

SONIC TACKBOARD PANELS

SONIC ABSORBER PANELS Tackboards are a versatile sound transmission inhibitor with tackability. They feature an industrial insulation board core for stability, strength and excellent tackablility. When laminated with vinyl, Tackboards provide a low-maintenance, mold and mildew-resistant surface, which is easy-to-clean. Our Tackboards may also be fabric covered for enhanced noise inhibition, while providing a resilient surface that heals quickly from pinholes and repeated bulletin board use by posting of displays or messages. Choose from a variety of sizes, colors and trims to fit your classroom, office, lobby or conference room.

A LARGE VARIETY OF STYLISH FINISHES in Type I or Type II (Class A) fabric backed vinyls. For tackability a large variety of fabrics are available. See the “Finishes” page on Lamvin.com for a direct link to our recommended suppliers’ catalogs which include detailed images of an array of designs. Custom fabrics and printed fabrics are also options. All finishes shall be reviewed for panel stability.
