

SONIC SOUND BLOCK™ PANEL

High NRC and STC ratings
 Excellent acoustical performance
 Class A fire rated
 Standard, designer or C.O.M fabric
 Custom sizing

SONIC SOUND BLOCK™ PANEL

SONIC SOUND BLOCK PANELS are noise barrier wall panels manufactured specifically as a double duty acoustical panel that offers both superior sound absorption and noise blocking performance. These noise barrier wall panels are the solution to speech privacy problems, providing clients the confidence that confidential conversations will not be overheard.

SONIC SOUND BLOCK PANELS ARE CONSTRUCTED USING 1 LB. PER SQUARE FOOT NON-REINFORCED MASS LOADED VINYL BARRIER SANDWICHED BETWEEN TWO LAYERS OF A 6-7# PCF RIGID FIBERGLASS BOARD. Panels may be finished in custom, designer or C.O.M. fabric. Sonic Sound Block Panels can be installed with impaling clips and construction adhesive. Due to panel weight 2.5 lb per square foot, panels must be installed from floor to ceiling. Floor molding can be re-installed after installation of Sonic Sound Block Panels.

APPLICATIONS:

- Corporate Offices / Conference Rooms
- Hotels and Restaurants
- Doctor's Offices
- Anywhere noise is a concern
